Scripps Health Plan

2026 Utilization Management Program Description

I. Mission, Vision and Values

Mission

Scripps strives to provide superior health services in a caring environment and to make a positive, measurable difference in the health of individuals in the communities we serve.

We devote our resources to delivering quality, safe, cost effective, socially responsible health care services. We advance clinical research, community health education, education of physicians and health care professionals and sponsor graduate medical education.

We collaborate with others to deliver the continuum of care that improves the health of our community.

Vision

Scripps Health will continue to be the leading health care delivery system in the greater San Diego community, as evidenced by the highest clinical quality, patient safety, and patient, physician and employee satisfaction. This will be achieved through unending focus on patient-centered and compassionate care, cost-effective operations, research, advanced technology, innovation, and health equity.

Values

We provide the highest quality of service

Scripps is committed to putting the patient first and quality is our passion. In the new world of health care, we want to anticipate the causes of illness and encourage healthy behavior for all who rely on us for service. We teach and encourage patients to participate in their care and to make well-informed decisions. We will be their advocate when they are most vulnerable. We measure our success by our patients' satisfaction, their return to health and well-being, and our compassionate care for dying patients, their families and friends.

We demonstrate complete respect for the rights of every individual

Scripps honors the dignity of all persons, and we show this by our actions toward one another and those we serve. We embrace the diversity that allows us to draw on the talents of one another. We respect and honor the cultural, ethnic and religious beliefs and practices of our patients in a manner consistent with the highest standards of care. All this is done in a compassionate setting. Our goal is to create a healing environment in partnership with all caregivers who are committed to serving our patients.

We care for our patients every day in a responsible and efficient manner

Scripps serves as a major community health care resource for San Diego County and, as such, we are accountable for the human, financial and ecological resources entrusted to our care as we promote healing and wholeness. We begin from a base of excellence and collaborate with co-workers, physicians, patients, and other providers to find new and creative ways to improve the delivery of health care services. All members of our community will have access to timely, affordable and appropriate care.

Scripps Health Plan

2026 Utilization Management Program Description

II. Purpose

The purpose of the Scripps Health Plan (SHP) Utilization Management (UM) Program is to meet members' needs by providing access to necessary care in the most direct, cost-effective and coordinated manner to improve the health of our members. SHP is committed to meeting member needs and assuring that they are receiving quality care and appropriate utilization of resources without barriers.

Health care services will be provided by SHP's integrated network of participating providers (including hospitals, physicians, and ancillary providers). SHP may delegate various UM functions to Independent Physician Associations (IPAs) or Pharmacy Benefit Managers (PBMs) to provide certain health care services to SHP members.

III. Goals

SHP's UM program goals are:

1. To maintain systematic, comprehensive, and ongoing UM processes for the timely and effective delivery of health care services to SHP members.
2. To optimize health care resource utilization and ensure the delivery of quality health care services at the appropriate level of care.
3. To ensure that appropriate care based on the member needs and benefits, consistent with professionally recognized standards of practice, is provided to all members and not withheld or delayed for any reason, including a potential financial gain and/or incentive to participating providers or others.
4. To coordinate with practitioners, IPAs, hospitals, and ancillary providers in the provision of outpatient and inpatient services provided to SHP members.
5. To engage members in their health care through disease management and self-education programs.
6. To assist members in navigating the health system and community resources using the providers and case management program.
7. To monitor procedures to ensure that members are not discriminated against based on race, color, national origin, ancestry, religion, sex, marital status, gender, gender identity, sexual orientation, age, disability or any of the following health status-related factors: medical condition (including physical and mental illnesses), claims experience, receipt of health care, medical history, genetic information or evidence of insurability, including conditions arising out of acts of domestic violence.

IV. Objectives

SHP UM program goals are achieved by accomplishing the following objectives:

Scripps Health Plan

2026 Utilization Management Program Description

1. Monitor and evaluate the timeliness, efficiency, and effectiveness of the delivery of health care services while providing quality care, including timely access to care and accessibility to health services.
2. Monitor, evaluate and improve utilization practice patterns of participating practitioners, hospitals and ancillary service providers.
3. Monitor and evaluate the utilization of services to ensure that services are not over or under-utilized and intervene with practitioners and members when appropriate.
4. Educate members, practitioners, hospitals and ancillary providers about the quality and cost-effective management of health care services.
5. Assure member care transitions are managed to prevent adverse events.
6. Provide outpatient case management and Complex Case Management (CCM) for members and providers.
7. Perform peer-to-peer clinical reviews and other UM activities.
8. Comply with federal and state law and accrediting body requirements.

V. Program Authority and Accountability

The SHP Management Advisory Committee (MAC) has ultimate accountability for the evaluation and oversight of the quality and cost-effectiveness of the UM program. The MAC has delegated authority for UM program direction and monitoring to the multi-disciplinary Medical Management Committee (MMC) which is responsible for oversight of SHP's UM program. The MMC is responsible for the ongoing monitoring, evaluation, and improvement of the UM program.

The SHP Medical Director is Chair of the MMC and is the Senior Plan Officer responsible for the direction and overall functioning of the UM program and ensures allocation of adequate resources and staffing. A summary of UM activity will be included in the quarterly UM program report submitted to the MAC. At least annually, the UM Program Description and the UM Work Plan are evaluated and approved by the MMC and the MAC and revised, as necessary. A semi-annual UM Work Plan report is also prepared and reviewed and approved by the MMC and the MAC.

Scripps Health Plan

2026 Utilization Management Program Description

VI. Committees

Management Advisory Committee

The Management Advisory Committee (MAC) is responsible for adopting and implementing the policies governing SHP, monitoring and evaluating the effectiveness of the management of SHP's business operations, and maintaining its financial stability. The MAC shall meet at least quarterly and review reports and recommendations from the various subcommittees as appropriate. Minutes with actions taken, responsible persons, and recommendations will be maintained.

MAC Membership:

President is responsible for the oversight and monitoring of SHP. The President has the authority and responsibility for SHP's administrative, fiscal, and managed care operations. Within these areas are financial analysis, contracting/provider relations, claims operations, regulatory compliance, and other administrative functions. The President is currently responsible for all health plan contracting, including Health Care Service Plans (HCSPs) that contract with Scripps Health Plan Services (SHPS) under its Full Knox-Keene license.

Vice President (VP) of Managed Care Operations reports to the President on fiscal, operational, and administrative matters. Specifically, the VP, Managed Care Operations, acts as the Chair of the Healthcare Operations Committee (HOC) and the Public Policy Committee (PPC) and is responsible for general oversight of managed care operations, such as compliance, customer service, claims, credentialing, enrollment, utilization, clinical operations, performance improvement, contracting, provider relations, systems, reporting, program reconciliation, network management, sales, health plan operations, risk adjustment, and electronic data exchange.

Scripps Health Plan

2026 Utilization Management Program Description

The VP, Managed Care Operations, works closely with the Medical Director regarding medical management matters. In this way, the VP, Managed Care Operations, acts as a liaison between managed care operations and clinical activities by resolving issues or concerns that may arise in the health care delivery system. Moreover, the VP, Managed Care Operations, understands the capabilities of leveraging information systems, manages ongoing data analysis, physician trends, and other valuable information used in developing policies and improving programs.

MAC membership is composed of representatives nominated and approved by the MAC from key departments within SHP. All regular MAC members shall be voting members (i.e., ad hoc members do not have voting rights). In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority). Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Healthcare Operations Committee

Chaired by the VP, Managed Care Operations, and Co-Chaired by the Sr. Director, Service Operations, meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Healthcare Operations Committee (HOC) is a multi-disciplinary group which reviews all health care delivery system issues that affect members. This committee oversees SHP operations, including reimbursement and recoveries, member and provider services, and administrative functions. This committee also guides SHP's financial planning, including product design, underwriting, premium rating, risk arrangements, and reinsurance.

The HOC is a sub-committee of the Management Advisory Committee. Membership consists of Plan leaders from Medical Management, Payment Services, EDI, Enrollment, Payor & Provider Relations, and Compliance. In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. At the discretion of the Chairperson, the Committee may include additional non-voting members who may be employees of the Plan. All HOC members are expected to remain free of conflicts of interest and to maintain confidentiality regarding sensitive matters that may be discussed. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Medical Management Committee

Chaired by the Medical Director, meetings are held at least quarterly, and additional meetings may be scheduled as required. The Medical Management Committee (MMC) provides a coordinated process for the ongoing monitoring and evaluation of the effectiveness in the utilization and cost of clinical services rendered to members. In its role as the key clinical decision-making body, the MMC receives, at a minimum, a quarterly summary of all QM and UM activities, including findings and actions taken by all subcommittees. A summary of QM and UM activity will also be included in the quarterly QM and UM program reports submitted to the

Scripps Health Plan

2026 Utilization Management Program Description

MAC. Annually, the QM and UM Program Descriptions are evaluated and approved by the MMC. This committee is also responsible for monitoring clinical practices, evaluating provider utilization and adherence, and reviewing and making recommendations to member appeals and grievances trends.

1. MMC Membership:

Membership is composed of SHP staff and participating providers reflecting an appropriate mix of the major practice specialties provided within the SHPS provider network. In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member.

The Medical Director shall nominate community providers to be member(s) with the appropriate specialty background and experience for the committee. Nominees are reviewed and approved by the MMC. A review will include assessment of available practice information, past experience, and professional reputation for medical expertise. Each physician member of the MMC will serve a two-year term and may be re-appointed by the Medical Director. The MAC shall have the authority to approve or deny membership of a provider to join the committee. While no special training or certification will be required of committee members, physician members must have an unrestricted license in the state of California and be a fully credentialed member of the SHPS provider network. A psychiatrist or qualified mental health representative will be a member of the MMC for coordination of medical and mental health care.

The committee members must sign a confidentiality statement prior to attending their first meeting, and annually thereafter. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request. Providers involved in medical management decisions will not make decisions based upon financial interests or incentives.

2. MMC Responsibilities:

- a. Annually review and evaluate the effectiveness of the SHP UM program.
- b. Annually review and approve the UM Program Description and annual UM Work Plan and evaluate the previous year's UM Work Plan.
- c. Monitor and evaluate adherence to evidence-based practice standards for practitioners and other healthcare providers and implement corrective action plans, when applicable.
- d. Identify areas requiring focused review, evaluate the results of the review, implement clinical improvement initiatives, and evaluate results of the initiative.
- e. Review and investigate provider utilization adverse trends, including corrective action recommendations, when applicable.
- f. Annually review, approve, and disseminate nationally recognized clinical practice guidelines for making medical necessity decisions, in addition to any changes to guidelines that occur during

Scripps Health Plan

2026 Utilization Management Program Description

- the year.
- g. Identify, approve, evaluate, and modify key performance indicators and benchmarks for utilization of services and value-based outcomes and implement corrective action plans for variances based upon over and under-utilization of services.
 - h. Ensure follow-up is completed on all required actions.
 - i. Evaluate trends and communication with other departments during integrated meetings or the Member Experience Committee (MEC), ensuring emphasis on the member experience and quality.
 - j. Provide feedback and education to providers on adverse utilization findings.
 - k. Review UM policies, procedures, and standards.
 - l. Review delegation oversight reports and monitor delegated activities and corrective action plans, when applicable.
 - m. Oversee Physician and UM Nurse Reviewers responsible for ongoing individual case review.
 - n. Partner with the Chief Compliance Officer when there is potential fraud, waste, or abuse, in compliance with state and federal regulations.
 - o. Review, trend, and analyze grievance and appeal reports, including the development, implementation, and re-assessment of action plans.
 - p. Assess the characteristics and needs of member populations and relevant subpopulations.
 - q. Assess new technologies and new applications of existing technology and provide recommendations for adoption.
 - r. Review and evaluate the disease management/complex care management programs, including outcomes of the programs and the need to modify interventions based upon the evaluations.
 - s. Revise and update case management processes to address member needs as necessary.

Pharmacy and Therapeutics Committee

Chaired by the Medical Director and Co-Chaired by the Manager, Pharmacy, meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Pharmacy and Therapeutics (P&T) Committee is organized to review and approve the drug formulary and new medical technologies based on clinical scientific evidence and standards of practice, considering drug therapeutic advantages in terms of safety and efficacy. The P&T Committee is a policy-recommending body on matters related to the safe and therapeutic use of medications and provider prescribing practices.

Scripps Health Plan

2026 Utilization Management Program Description

The P&T Committee recommendations are subject to the administrative approval process, and summaries are brought to the MMC.

SHP may delegate the development and execution of pharmaceutical management procedures to a Pharmacy Benefits Manager (PBM). SHP and SHP P&T Committee will retain primary responsibility for pharmacy benefit policies and procedures and development of the formulary. The PBM will serve as a resource for information regarding the formulary, preferred drug lists, prior authorization lists, medication requests, restrictions, and copays. The process of the development and execution of pharmaceutical management procedures delegated to the PBM will be reviewed on a regular basis and reported to the P&T Committee.

1. P&T Committee Membership:

Membership consists of primary and specialty care representation. At the discretion of the Chairperson, the P&T Committee may include additional non-voting members who may be employees of SHP or the PBM. All committee members shall complete a conflict of interest statement pertaining to any financial or other relationships with any pharmaceutical or device manufacturers.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member.

2. P&T Committee Responsibilities:

- a. Meet the responsibilities of a P&T Committee, as provided for in HSC §1367.41 and 45 CFR §156.122.
- b. Maintain the drug formulary to promote safety, effectiveness, and affordability according to drug selection process.
- c. Review new drugs, drug classes, new clinical indications, therapeutic advantages, new chemical entities, and new safety information. Base clinical decisions on the strength of the scientific evidence and standards of practice, including assessing peer-reviewed medical literature, pharmaco-economic studies, outcomes research, and other related information.
- d. Recommend formulary status and what position or tiered covered medications should occupy on formulary.
- e. Review the drug formulary and therapeutic classes at least annually.
- f. Interface with other SHP QM and UM committees as appropriate.
- g. Ensure the delegated PBM P&T Committee performs the following major functions:
 - Maintains the drug formularies to promote safety, effectiveness, and affordability according to drug selection process.

Scripps Health Plan

2026 Utilization Management Program Description

- Reviews new drugs, drug classes, new clinical indications, therapeutic advantages, new chemical entities, and new safety information.
 - Recommends formulary status and what position or tiered covered medications should occupy on formulary.
 - Reviews the drug formulary and therapeutic classes at least annually.
- h. Review the process of the development and execution of pharmaceutical management procedures delegated to PBM at least annually.
 - i. Enforce the appropriate Average Wholesale Price discounts and rebate(s) back to the health plan.
 - j. Promote the appropriate use of high quality and cost-effective pharmaceuticals for SHP members.
 - k. Ensure compliance with appropriate standards and state and federal regulations.
 - l. Review policies that guide clinical prior authorization criteria, step therapy protocols, exceptions, and other UM processes, including drug utilization review, quantity limits, and therapeutic interchange.
 - m. Ensure that the formulary drug list or lists cover a range of drugs across a broad distribution of therapeutic categories and classes and recommended drug treatment regimens that treat all disease states and do not discourage enrollment by any group of members.
 - n. Serve as a policy recommending body on matters related to the safe and therapeutic use of medications.
 - o. Monitor drug shortages and recalls and ensure appropriate communication to SHP members.
 - p. Make consensus decisions on all formulary additions and deletions and drug use/benefit policies. If no consensus is established, the issue is put to a vote with the decision determined by majority vote of the quorum. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority).

Public Policy Committee

Chaired by the VP, Managed Care Operations, and Co-Chaired by the Sr. Director, Service Operations, meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Public Policy Committee (PPC) provides members and providers a forum with senior leaders of SHP to identify, evaluate, and monitor social, legislative, and regulatory or public policy issues that affect or could affect the delivery of compassionate care, the rights and dignity of members and providers, and the accessibility of services. Committee recommendations and summary reports outlining activities are submitted to the MAC.

Scripps Health Plan

2026 Utilization Management Program Description

PPC Membership:

Membership shall consist of: (1) at least 51% of the members shall be subscribers and/or members (subscribers and/or members shall not be SHP employees, network providers, subcontractors, or group contract brokers or persons financially interested in SHP); (2) at least one member of the MAC; and (3) at least one provider. At the discretion of the Chairperson, the committee may include additional non-voting members who may be employees of SHP, network providers, or other individuals as may be necessary.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Policy & Procedure Committee

Chaired by the Director, Regulatory Compliance, and Co-Chaired by the Manager, Coding, meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Policy & Procedure (P&P) Committee responsibilities are to create a well communicated process for creating new policies, changing existing policies, ensuring annual policy review, and adhering to the regulatory agencies that govern health plans. This committee ensures participation from key stakeholders within SHP. This committee assesses policies to ensure regulatory compliance, creates a policy repository to serve as an authoritative source for policies, assists in communication of policies, and ensures a summary of changes are presented further to the other governing committees. All clinical policies will have direction from clinicians, including but not limited to, the Medical Director. Committee approval, minutes, and summaries may be brought to other committees for review.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Credentialing & Peer Review Panel

The Credentialing & Peer Review Panel (CPRP) is chaired by the Medical Director, and Co-Chaired by a network provider/specialty/etc. Meetings are held at least quarterly, and additional meetings may be scheduled as required. The panel is composed of practicing physicians and reports to the MMC. This panel is responsible for the oversight of provider credentialing and re-credentialing activities, including the review and approval of credentialing policies and procedures and the peer review of cases referred to the panel.

Scripps Health Plan

2026 Utilization Management Program Description

regarding potential quality issues. This panel has been delegated to make all final decisions regarding provider credentialing and peer review activities. Significant trends and quality of care concerns are escalated to the MMC.

1. CPRP Membership:

All physicians are voting members. The MMC shall nominate physician member(s) with the appropriate specialty background and experience for the panel. Nominees are reviewed and approved by the CPRP. A review will include assessment of available practice information, past QM, UM, or credentialing committee experience, and professional reputation for medical expertise. Each physician member of the CPRP serves a two-year term and may be re-appointed by the Medical Director. While no special training or certification will be required of panel members, physician members must have an unrestricted medical license in the state of California and be a fully credentialed member of the SHPS provider network. Panel members may not vote on any providers when there is a conflict of interest.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority). Each panel member is expected to attend a minimum of 75% of the panel meetings on an annual basis. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

2. CPRP Responsibilities:

- a. Make credentialing and re-credentialing decisions for providers and practitioners within the SHPS provider network.
- b. Perform annual review of the effectiveness of SHP credentialing and re-credentialing program.
- c. Monitor performance of peer review activities, including identification, action, and resolution of potential quality issues, and confirmation of corrective actions arising from quality of care cases.
- d. Perform peer review of credentialing and re-credentialing issues.
- e. Address provider credentialing and re-credentialing compliance issues, including corrective action recommendations.
- f. Review and make recommendations on credentialing and re-credentialing policies and procedures and standards, in compliance with regulatory and NCQA guidelines.
- g. Review areas concerning over/under utilization, quality of care, clinical practice guidelines, and other pertinent aspects of clinical care.
- h. Approve credentialing and re-credentialing of organizational provider (e.g., hospitals, home health agencies, skilled nursing facilities, nursing homes, free-standing surgical centers, etc.) appointments to the provider network.

Scripps Health Plan

2026 Utilization Management Program Description

- i. Provide for the rights to an appeal from a provider who is denied acceptance to the network, is forced to no longer participate in the network, or who has been reported to the state medical board, pursuant to BPC § 805 and 805.1.
- j. Review and monitor delegated credentialing and re-credentialing activities.

Regulatory Oversight Committee

Chaired by the Chief Compliance Officer, and Co-Chaired by the Director, Quality, meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Regulatory Oversight Committee (ROC) provides oversight, prioritization, resources, guidance, and advocacy for SHPS Compliance Plan and related work activities. This committee provides advice and assistance to the Chief Compliance Officer in their responsibilities for the design, implementation, and operation of an effective compliance program. The ROC meets on at least a quarterly basis to review compliance concerns, implementation, and performance of the Compliance and Anti-Fraud Plans; fraud, waste, and abuse activities; oversight of delegated entities; privacy concerns; and trends and regulatory updates with applicable guidance and interpretations. With the medical direction of the Medical Director, the ROC also reviews annual delegation audits to ensure adequate ongoing monitoring of delegated entities. The ROC reviews all program descriptions for services delegated to the delegate, annual work plans, evaluations, and related administrative policies for compliance with applicable UM, QM, credentialing, and claims payment protocols. The ROC is responsible for ensuring delegated entities remain in good standing and respond to audits and corrective action plans timely and satisfactorily to address any identified deficiency. The ROC further reviews topics related to access and availability and appeal and grievance trends.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Member Experience Committee

Chaired by the Sr. Director, Service Operations, and Co-Chaired by the Manager, Customer Service, the meetings are held at least quarterly, and additional meetings may be scheduled as required.

The Member Experience Committee (MEC) is responsible for overseeing the member experience across the continuum of care, including overseeing strategy, recommending best practice standards, and monitoring the performance and progress of health plan operations that impact the member experience. This committee reviews various sources of information, such as member inquiries, appeals and grievances, and potential quality issues, to identify improvement initiatives and mitigate risks.

The Performance Improvement Taskforce is a subcommittee of the MEC and reviews member correspondences to identify grievances and opportunities for improvement. Member correspondences, which

Scripps Health Plan

2026 Utilization Management Program Description

may constitute a grievance, are reviewed by the Director, Quality, and confirmed grievances are processed accordingly. The Manager, Customer Service, reviews telephone calls and associated documentation for opportunities to improve member inquiry resolution. Member telephone calls are also screened for potential quality issues and reviewed by the quality team.

In order for business to be conducted, a quorum must be present. A quorum is defined as more than half of the voting members of the committee (i.e., simple majority) but may never be less than three (3) voting members. Each committee member is expected to attend a minimum of 75% of the committee meetings on an annual basis. Failure to attend may result in replacement of the member. Minutes of all meetings shall be considered confidential and are maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request.

Committee Minutes

Minutes will be documented for all committee and panel meetings and will be completed prior to the date of the next meeting. Minutes of all meetings shall be considered confidential and maintained in SHP administrative offices and/or on a secure cloud-based repository. Minutes will be available for review by regulatory and accrediting body representatives upon request. Copies of all attachments and handouts from meetings will be included with the filed meeting minutes. Minutes shall not be copied or removed from the SHP administrative offices and/or secure cloud-based repository without the express consent of the Medical Director or Chief Compliance Officer. Contents of the minutes will include, at a minimum, the following elements:

1. Date, time, and location of meeting.
2. Time meeting called to order and by whom.
3. List of members present.
4. List of guests present.
5. Approval of previous meeting minutes.
6. Items of old business, including topic, action taken, and status/responsible party.
7. Items of new business, including topic, action taken, and status/responsible party.
8. Time meeting adjourned and by whom.
9. Date, time, and location of next scheduled meeting.
10. To ensure appropriate follow-up and ability to track issues through the resolution process, all committee minutes will follow the specific format approved by the HOC. This format calls for minutes to be documented in a grid format with the following column headings:
 - a. Topic – A brief description of the agenda item.

Scripps Health Plan

2026 Utilization Management Program Description

- b. Action Taken – A summary of the discussion, any data or handouts presented, and issues needing improvement (if applicable). To also include a summary of recommendations made by the committee and any barriers to completion (if applicable).
- c. Status/Responsible Party – The specific name of the party responsible for ensuring that the action item(s) is/are completed, and the current status of the action item(s) identified.

VII. UM Functions and Roles

UM activities will be coordinated and performed by SHP's UM Department staff under the direction of the Medical Director and the Director of Utilization Management.

Medical Director

Responsibilities include the following:

1. Provide senior executive oversight of the development and implementation of the UM program.
2. Maintain a current, unrestricted medical license in the state of California and maintain fully credentialed status within the SHPS provider network, regardless of full-time practice status.
3. Ensure the implementation of the UM Program Description and the UM Work Plan.
4. Provide oversight and coordination of UM activities with IPA Medical Directors, as applicable.
5. Participate in the development of the UM Program Description, the UM Work Plan and the evaluation of the UM program's effectiveness.
6. Monitor compliance with UM program authorization and referral criteria.
7. Provide oversight of the consistent application of criteria in making service determinations, review results and ensure remedial action is implemented for any issues identified.
8. Ensure that internal and external corrective actions are taken when problems are identified.
9. Oversee the review of medical necessity denials and obtain specialist physician review for questionable or difficult cases. Physician consultants from the appropriate specialty areas of medicine and surgery who are certified by the American Board of Medical Specialties (ABMS) will be utilized as appropriate in the review process to provide recommendations to Qualified Physician or Appropriate Licensed Clinical Reviewer on authorization requests.
10. Provide oversight of provider groups' Medical Management committee activities and report pertinent information to MMC.
11. Coordinate and communicate information and decisions to network physicians.

Scripps Health Plan

2026 Utilization Management Program Description

12. Chair the Medical Management Committee and the P&T Committee (if not delegated).
13. Analyze UM data and establish priorities for focused studies (high-volume, high-risk and high-cost areas).
14. Contribute to the development, review and dissemination of clinical studies and practice guidelines/standards to participating providers. Monitor provider adherence to professionally recognized standards of clinical care adopted by the MMC.
15. Evaluate clinical performance outcomes and service indicators for ambulatory and inpatient care.
16. Evaluate data for variances that may represent potential under or over utilization of services.
17. Present semiannual UM summary reports to the MMC and the MAC.
18. Serve as a liaison to affiliated medical groups and network providers.
19. Attend contracted provider operations meetings.
20. Participate in subcommittees and workgroups.
21. Champion process improvements to improve compliance with preventive medicine guidelines.
22. Implement performance improvement projects.

Qualified Physician or Appropriate Licensed Clinical Reviewers

Medical necessity determinations are conducted by qualified physician or appropriately licensed clinical reviewer with training and experience relevant to the requested service, ensuring specialty-matched review consistent with applicable state and federal regulations and NCQA standards. Qualified Physician or Appropriate Licensed Clinical Reviewer are primarily physicians; however, other licensed practitioners may be utilized when clinically appropriate to support specialty-specific review. SHP delegates medical necessity review activities to Medical Review Institute of America (MRIOA), which is responsible for the credentialing, ongoing training, and competency assessment of its reviewers. All qualified physicians or appropriate licensed clinicians operate under the oversight of the Medical Director and must comply with SHP's utilization management policies, procedures, and clinical guidelines. Reviewer performance is monitored, including inter-rater reliability testing to ensure consistent application of medical necessity criteria. Qualified Physician or Appropriate Licensed Clinical Reviewer are not incentivized to deny, delay, or restrict medically necessary care in compliance with all applicable federal and state requirements. Review decisions are clearly documented in writing on authorization requests, including the clinical rationale and specific reasons for denial when applicable, along with the reviewer's signature and date of determination. All Utilization Management decision documentation is retained for a minimum of five (5)

Scripps Health Plan

2026 Utilization Management Program Description

years or longer, as required by current regulatory requirements, with the last two (2) years being easily accessible.

Sr. Director of Utilization Management

The Sr. Director of Utilization Management is responsible for the implementation and monitoring of the UM program.

The Sr. Director's responsibilities include, but are not limited to:

1. Provides oversight and leadership within assigned area of responsibility. Assists in the management of the overall operational, budgetary, and financial responsibilities and activities.
2. Plans and implements systems that accomplish work objectives and fulfill the mission and goals efficiently and effectively.
3. Plans and allocates resources to effectively staff department and meet productivity and annual goals. Plans, evaluates, and improves the efficiency of processes and procedures to enhance speed, quality, efficiency, and output.
4. Formulates business decisions that are cost effective, responsible, accountable, justifiable, and defensible in accordance with organization policies and procedures.
5. Reviews performance data that includes timeliness, quality, satisfaction surveys, engagement, utilization trends, and interrater and audit reports.
6. Participates in the preparation and maintenance of reports necessary to carry out the functions of the area of responsibility.
7. Prepares periodic reports for management to track goal accomplishment. Leads colleagues using performance management and development process.
8. Oversees UM department management and staff activities.
9. Participates in all required regulatory meetings including but not limited to MMC and MAC meetings.
10. Participates in the annual evaluation of the UM program's effectiveness and recommend revisions to the UM Program Description and the UM Work Plan when applicable.
11. Monitors and analyzes internal/external data trends and patterns that affect UM activities.
12. Ensures compliance with state, federal and accrediting body requirements.
13. Implements changes to the UM program utilizing member and provider satisfaction data as well as MAC recommendations.

Scripps Health Plan

2026 Utilization Management Program Description

14. Monitors and analyzes internal and external data trends and patterns that affect or inform UM activities.

Director of Utilization Management

The Director of Utilization Management is responsible for the implementation and monitoring of the UM program. The Director of Utilization Management is responsible for the operation of the UM staff functions, including prior authorization and data analytics reporting. The Director of Utilization Management is responsible for the day-to-day operations of the UM functions in prior authorization.

The Director's responsibilities include, but are not limited to:

1. Coordinates with SHP departments and IPAs in the implementation of the UM program functions.
2. Oversees UM department management and staff activities.
3. Participates in MMC meetings.
4. Participates in the annual evaluation of the UM program's effectiveness and recommends revisions to the UM Program Description and the UM Work Plan when applicable.
5. Coordinates inter-rater reliability reviews to monitor the consistency of criteria application on at least a quarterly basis.
6. Ensures compliance with state, federal and accrediting body requirements.
7. Prepares quarterly UM reports for the MMC and the MAC.
8. Implements changes to the UM program utilizing member and provider satisfaction data as well as MAC recommendations.
9. Promotes, coordinates, and communicates UM activities throughout the health care delivery system.
10. Monitors and analyzes internal and external data trends and patterns that affect or inform UM activities.
11. Participates in staff training, monitors for consistent application of UM criteria by staff, for each level and type of UM decision and monitors documentation for adequacy.

Manager Utilization Management

Qualified, licensed health care professional supervises the daily clinical and non-clinical UM activities. Daily supervision includes, but is not limited to:

1. Provides day-to-day supervision of assigned UM staff.

Scripps Health Plan

2026 Utilization Management Program Description

2. Provides day-to-day monitoring of timeliness and work queues.
3. Monitors for consistent application of UM criteria by the UM staff, for each level and type of UM decision.
4. Monitors documentation for adequacy.
5. Monitors for UM controls.
6. Participates in staff training and interrater audits, including providing feedback as applicable.
7. Participates in policy and procedures review and updates as necessary.
8. Available to staff onsite or telephonically.

Utilization Review Nurses, Concurrent Review Nurses, Retrospective Review Nurses, and UM Support Staff Responsibilities

Staff who are not qualified health care professionals are under the supervision of an appropriately licensed health professional when there are explicit UM criteria and no clinical judgment is required. Qualified, licensed medical professionals will oversee or perform all functions listed below:

1. Verifies member eligibility, benefits, coverage and treatment arrangements for members.
2. Authorizes inpatient and outpatient hospital admissions in coordination with the member's Primary Care Physician (PCP) or other treating physician.
3. Authorizes services, including referrals to specialist physicians for consultation and treatment, when applicable, based upon guidelines.
4. Authorizes other outpatient and ancillary services including, but not limited to:
 - a. Outpatient (ambulatory) surgery.
 - b. Skilled nursing facility and long-term inpatient care.
 - c. Home health.
 - d. Durable medical equipment – prosthetics, orthotics and supplies (purchase/lease).
 - e. Diagnostic testing.
 - f. Laboratory and radiology services.
 - g. Rehabilitative services.
5. Performs prospective, concurrent and retrospective review for medical necessity, appropriateness

Scripps Health Plan

2026 Utilization Management Program Description

of service and level of care and continued delivery of services.

6. Consistently applies medical necessity criteria in approving, modifying, or denying a referral request.
7. Coordinates discharge planning activities in coordination with the attending physician, hospital discharge planning staff and member/family.
8. Provides psychosocial support and crisis management intervention as needed for members and families.
9. Assists in claims review when accuracy, appropriateness of charges or authorization information is required.
10. Collects data on sentinel events or potential quality issues (PQIs) and report to QM staff and the Chief Compliance Officer.
11. Collects and reports UM and quality information to be used in the re-credentialing process.
12. Refers all potential denial or modification determinations related to medical necessity to the appropriate Qualified Physician or Appropriate Licensed Clinical Reviewer including review summary and medical notes.
13. May issue administrative denials for non-medical necessity reasons such as for lack of coverage due to eligibility or benefit plan, lack of required documentation or unmet administrative requirements and for redirection to providers within the primary medical group where appropriate due to provider contract status (e.g., out-of-network when adequate in-network access exists).
- 14.

Sr. Director of Case Management

The Sr. Director of Case Management is responsible for the implementation and monitoring of the CM program.

The Sr. Director's responsibilities include, but are not limited to:

1. Provides oversight and leadership within assigned area of responsibility. Assists in the management of the overall operational, budgetary, and financial responsibilities and activities.
2. Plans and implements systems that accomplish work objectives and fulfill the mission and goals efficiently and effectively.
3. Plans and allocates resources to effectively staff department and meet productivity and annual goals. Plans, evaluates, and improves the efficiency of processes and procedures to enhance speed, quality, efficiency, and output.
4. Formulates business decisions that are cost effective, responsible, accountable, justifiable, and defensible in accordance with organization policies and procedures.

Scripps Health Plan

2026 Utilization Management Program Description

5. Reviews performance data that includes timeliness, quality, satisfaction surveys, engagement, and interrater and audit reports.
6. Participates in the preparation and maintenance of reports necessary to carry out the functions of the area of responsibility.
7. Prepares periodic reports for management to track goal accomplishment. Leads colleagues using performance management and development process.
8. Oversees CM department management and staff activities.
9. Participates in all required regulatory meetings including but not limited to MMC and MAC meetings.
10. Participates in the annual evaluation of the CM program's effectiveness and recommend revisions to the Program Description and the Work Plan when applicable.
11. Monitors and analyze internal/external data trends and patterns that affect CM activities.
12. Ensures compliance with state, federal and accrediting body requirements.
13. Implements changes to the CM program based on member and provider satisfaction data as well as MAC recommendations.
14. Monitors and analyzes internal and external data trends and patterns to identify factors that impact CM activities.

Manager of Complex Care Management

Responsibilities include the following:

1. Develops, implements and monitors the effectiveness of the CCM program standards and disease management.
2. Promotes, coordinates and communicates CCM and disease management activities throughout the health care delivery system, including referrals of members who may benefit from CCM services.
3. Oversees CCM staff activities and evaluates the performance of the assigned function.
4. Participates in MMC meetings.
5. Participates in the annual evaluation of the CCM and disease management program effectiveness, recommending revisions when applicable.
6. Monitors and analyzes internal and external data trends and patterns that affect CCM, concurrent review and disease management activities.
7. Oversees the transition of care functions for members who are hospitalized or utilizing emergency services.

Scripps Health Plan

2026 Utilization Management Program Description

8. Oversees the disease management programs offered to SHP members.
9. Participates in staff training, monitor for consistent application of UM criteria by staff, for each level and type of UM decision and monitor documentation for adequacy.
10. Ensures compliance with state, federal and accrediting body requirements.
11. Prepares CCM and disease management reports for the MMC.

Case Management Staff Responsibilities

Staff who are not qualified health care professionals are under the supervision of an appropriately licensed health professional, when there are explicit criteria, and no clinical judgment is required. Qualified, licensed medical professionals will oversee or perform all functions listed below:

1. Identifies members with complex needs through the case management evaluation process, enrolls the member in case management when delegated, or refers to the member's health plan Case Management department when not delegated.
2. Acts as a primary source of care for members with complex health needs, with a wide range of engagement including collaboration with discharge planning, reviews current and historical clinical history, coordinates referral needs, mental health status and conducts transitions of care.
3. Serves as a subject matter expert, consults, trains and educates other clinical and non-clinical support staff when needed.
4. Conducts clinical assessments, health screenings (depression, fall risk, SDOH, etc.) and member outreach within the regulatory timeframes to address the medical, mental health and wellness needs of members using a set of clinical interviewing skills to incorporate community and social determinants, support services, lifestyle improvement and prevention opportunities into member's interactions.
5. Develops comprehensive and individualized care plans tailored to each member's specific needs by using the clinical complex care management information system to establish treatment goals.
6. Identifies and coordinates discharge need and transition to alternative levels of care by interfacing with providers, physicians, and family.
7. Ensures referrals for care and services are directed to appropriate network providers and obtains prior authorization for in-network and out-of-network services as appropriate.
8. Refers care to network providers and/or assists with redirection in network when appropriate.
9. Educates plan participants, providers, and physicians about community resources.
10. Evaluates the process periodically within the mandatory timeframes, implementing adjustments to improve outcomes, as needed and communicates as indicated with providers and health plan partners to obtain the necessary authorization for reimbursement of services or maximizing health care benefits.

Supervisor, Complex Case Management

Qualified licensed health care professional supervises the daily case management activities. Daily supervision includes, but is not limited to:

1. Provides day-to-day supervision of assigned Case Management staff.

Scripps Health Plan

2026 Utilization Management Program Description

2. Provides day-to-day monitoring of care plan timeliness and case assignments.
3. Monitors for consistent documentation and application of acuity levels, goals, and implementation of care plan.
4. Monitors documentation for initiation and completion of initial health screening and required documentation standards.
5. Participates in staff training and interrater audits including providing feedback as applicable.
6. Participates in policy and procedures review and updates as necessary.
7. Participates in workflow enhancements and process improvements as necessary.
8. Available to staff onsite or remotely.

VIII. Scope of the UM Program

SHP's UM program is designed to encompass all levels of utilization review activity within SHP's health care delivery system. The UM program is designed to provide a multi-disciplinary, integrated framework for designing, measuring, assessing, and ensuring compliance with benefit coverage and medical necessity of care and supporting improvements in the delivery of health care and services. Activities within the scope of the UM program are coordinated with plan providers and reported to the appropriate committees within SHP.

Members shall not be discriminated against in the provision of health care services consistent with the benefits covered in their policy based on race, color, national origin, ancestry, religion, sex, marital status, gender, gender identity, sexual orientation, age, disability or any of the following health status-related factors: medical condition, including physical and mental illnesses, claims experience, receipt of health care, medical history, genetic information or evidence of insurability, including conditions arising out of acts of domestic violence.

For additional details on this section, refer to the following policies:

1. SHPS 800 Prospective Authorization Review
2. SHPS 802 Concurrent Inpatient Management
3. SHPS 803 Continuity of Care
4. SHPS 804 Retrospective Authorization Review
5. SHPS 809 Denials and Modifications
6. SHPS 825 Specialist Referral Authorization and Tracking
7. SHPS 828 Out of Network Referrals

Scripps Health Plan

2026 Utilization Management Program Description

8. SHPS 830 Standing Authorizations
9. SHPS 875 UM Turnaround Time Standards
10. SHPS 885 Emergency, Post Stabilization Care and Transfer Utilization Review

Elective Inpatient Admission Authorization

Pre-admission authorization involves an assessment of the medical necessity, including evaluation of the proposed treatment plan, appropriateness of setting and level of care. It also includes the application of medical necessity criteria for a member's admission to a hospital prior to the admission.

This process is initiated by the member's PCP or other treating physician, preferably ten (10) business days prior to an elective admission. SHP uses nationally recognized clinical criteria to review the proposed admission, and if considered medically necessary, the admission will be authorized. Admission authorizations are subject to the following guidelines and limitations:

1. The admitting facility should verify authorization of all elective admissions with SHP prior to admitting a SHP member to that facility.
2. All authorizations are contingent upon the member's eligibility at the time services are rendered. This includes retrospective review for medical necessity. It is the responsibility of the rendering provider to confirm eligibility at the time of service.
3. Outpatient pre-admission test results may be required prior to elective admission.
4. If the proposed admission does not meet SHP's established criteria for admission, the case will be referred to the Medical Director, a Qualified Physician or Appropriate Licensed Clinical Reviewer for review and final determination. Any denial decision of a service will be made by a qualified healthcare professional.
5. SHP adheres to all regulatory guidelines regarding decision turnaround timeliness.

Concurrent Review

The following standards govern SHP's concurrent inpatient utilization management process and ensure compliance with DMHC regulations and NCQA Utilization Management requirements:

1. Concurrent review activities are performed by California-licensed Registered Nurses using SHP-approved, nationally recognized, and professionally accepted clinical criteria. Reviews include evaluation of the member's medical record, coordination with the attending physician, and when appropriate, communication with the member and/or their family to support safe and appropriate care planning.
2. Concurrent review is initiated within one business day of SHP receiving notification of an inpatient

Scripps Health Plan

2026 Utilization Management Program Description

admission or any service requiring continued stay review. This ensures timely assessment consistent with state regulatory expectations and NCQA timeliness standards.

3. Concurrent reviews are conducted at intervals consistent with medical necessity and may occur on-site, electronically, or telephonically. SHP collaborates with the hospital or ancillary provider to evaluate ongoing care needs for all continued stays or services.
4. All SHP staff conducting concurrent review must maintain professional conduct at all times and adhere to all applicable HIPAA, federal, state, DMHC, NCQA, and facility-specific confidentiality and security requirements.
5. Out-of-network (non-contracted) admissions are reviewed remotely (via telephone, electronic health record, or submitted documentation) to ensure timely assessment and safe coordination of services.
6. The concurrent review nurse, in collaboration with the member's Primary Care Provider (PCP) or treating physician, works with out-of-network or non-contracted providers to transition the member to contracted facilities or providers as soon as the member's condition is clinically stable and transfer is medically appropriate. For ambulatory services, transition planning will prioritize continuity and quality of care.
7. The concurrent review nurse monitors services rendered by out-of-network or non-contracted providers for potential quality issues (PQIs) and intervenes as indicated. Concurrent review is conducted using nationally recognized standards to ensure medically necessary care, prevent duplication of services, avoid gaps in care, and reduce risks that could negatively affect patient outcomes. Any potential quality concerns are referred to the Quality Management (QM) Department for further review and resolution consistent with QM protocols.
8. The concurrent review nurse refers all cases involving potential medical necessity concerns or possible denial decisions to the Medical Director, Qualified Physician or other Appropriately Licensed Clinical Reviewer for assessment and determination, consistent with DMHC and NCQA requirements that medical necessity denials be made by an appropriate clinical professional.
9. Before issuing a denial related to care currently being delivered, the concurrent review nurse, Medical Director, Qualified Physician or other Appropriately Licensed Clinical Reviewer contacts the treating provider to discuss the case and coordinate a safe, clinically appropriate care plan. No ongoing care will be discontinued until the treating provider has been notified and a transition plan is in place that meets the member's medical needs.

Concurrent Review Decision Making Timeframes:

1. SHP will make concurrent review decisions within twenty-four **(24) hours** of receiving all necessary information.
2. SHP will notify practitioners within twenty-four **(24) hours** of making concurrent review decisions.
3. SHP will provide members and practitioners with written or electronic confirmation of review decisions within twenty-four **(24) hours** of making concurrent review decisions.

Scripps Health Plan

2026 Utilization Management Program Description

Discharge Planning

Discharge planning is an integral component of the concurrent review process that is initiated at admission, or earlier when possible, with an assessment of the member's potential post-discharge care needs. It includes preparing the member and the member's family for ongoing care needs and initiating arrangements for placement or services needed after discharge. SHP staff will coordinate with hospital discharge planners, the attending physician, and appropriate ancillary service providers to assist in making necessary arrangements for post-discharge care needs.

Case Management

SHP's case management programs incorporate the dynamic processes of assessment, problem identification, care planning, intervention, monitoring, and evaluation. The programs use an interdisciplinary team approach to meet the Member's health care needs. Members are identified for case management who opt in to participate are assessed for needs when the case is initially opened.

Upon completion of the initial assessment, the case is assigned to the appropriate level of case management based on the Member's needs. Communication and collaboration will occur with the Primary Care Provider (PCP) as needed, as well as with any specialty-care Participating Providers involved in the Member's care.

The Member and family, as appropriate, are actively involved in the care plan, which is documented and updated on a periodic basis or when there is a change in health status. Both short-term and long-term goals are formulated, and the Member's progress toward those goals will be monitored. Outcomes are documented when the case is closed, and Member satisfaction with the case management process is assessed periodically. All pertinent information is relayed in a timely manner to the PCP, as necessary, throughout the case-management process.

Case management programs for Members at risk of poor health outcomes:

- General Case Management
- Post-Discharge/Transitions of Care Case Management
- Telephonic Disease Management, and Advance Care Planning
- Complex Case Management

General Case Management is a collaborative, Member-centered process of assessment, care planning, care coordination, health education, and advocacy to reduce or eliminate barriers to care. The assigned Case Manager works directly with the Member and the family/caregiver(s) to develop an Individualized Care Plan (ICP) that is focused on increasing access to resources and services that support the Members health needs. The Case Manager is responsible for coordinating benefits and services with other agencies/providers, monitoring progress, and ensuring interventions are in place to support the Member's Individualized Care Plan.

Post-Discharge and Transitions of Care Case Management is a subset of the General Case Management program. This program focuses on those Members discharged from a facility (inpatient/emergency/post-acute care) and provides timely education and assistance with access to care

Scripps Health Plan

2026 Utilization Management Program Description

and services, with the goal of preventing unnecessary readmissions. The Case Manager complete a transition of care assessment.

Telephonic Disease Management (TDM)/Advance Care Planning is a system of coordinated health care interventions and communications for defined patient populations with conditions where self-care efforts can be implemented to manage the conditions and to prevent complications and advance care planning needs

Complex Case Management (CCM) is provided to Members who have experienced a critical event or diagnosis requiring extensive use of resources and oversight to navigate the delivery of care and services. Case management becomes complex when the illness or conditions and are severe and require an intense level of management beyond that of General Case Management.

Case Management (CM) in collaboration with Good Medicine/Home Based care provided to Members who are homebound and require assistance with coordination of care, eliminating barriers to care, and care planning. The assigned Case Manager works directly with the physicians from Good Medicine/Home Based Care to provide coordination as needed and refers to other programs if criteria are met such as CHF/COPD, Complex Case Management, or end of life planning.

Program is the focused arrangement of the sequence of services and resources necessary to respond to a member's overall care requirements in catastrophic or complicated cases. Assures that the member is provided with quality care in the most cost-effective manner through appropriate utilization of all available health care resources.

Aa multi-disciplinary team approach to develop a treatment plan which may include the primary care physician, specialist, home health agencies, discharge planners, physical therapists, social workers, hospital UM nurses, SHP UM staff, the member, the member's family, and others as appropriate.

Members eligible for case management may vary depending on the population and reported trends, which are determined during the assessment of the Member's case management needs. The CCM team improves access to primary and specialty care, coordinates care for members who receive multiple services and identifies and reduces barriers to services for members with complex conditions.

Overall care management goal is to help members regain optimum health and/or improved functional capability, in the right setting and in a cost-effective manner. It involves a comprehensive assessment of the member's condition, social determinants of health, determination of available benefits and resources and development and implementation of care management plan with performance goals, monitoring, and follow-up. Outcome goals for case management will include:

1. Decrease in readmission rates.
2. Improve member satisfaction with the CCM process.
3. Decreased use of ER/Urgent Care.
4. Decreased member cancellation of appointments.
5. Improved member/family understanding of disease and treatment.
6. Improve care coordination needs.

Scripps Health Plan

2026 Utilization Management Program Description

7. Analysis of refusal rates.
8. Analysis of re-admit reasons in cohort discharged as clinically stable.

Care Management outcome data combined with member satisfaction survey data will be analyzed annually and process improvements implemented. Each process improvement will be evaluated quarterly to determine outcome improvement. Resources for member education will be evaluated annually.

Mental Health & Substance Use Disorder Services

Mental health services are provided by a licensed organization or professional providing diagnostic, therapeutic or psychological services for the treatment of mental health and substance use disorders. Mental health and substance use disorder providers include psychiatric hospitals (including psychiatric units within general acute care facilities), residential treatment facilities, psychiatrists, psychologists, licensed clinical social workers (LCSW), marriage and family therapists (MFT) and qualified autism service professionals and paraprofessionals.

Delegated Services

SHP delegates mental health services as defined above such as:

1. Mental health and substance use disorder services, including all inpatient and partial hospitalization care.
2. Mental health evaluations and treatment as well as treatment for substance use disorders, including all outpatient services.

Monitoring and Coordination

SHP monitors continuity and coordination of care for members and takes action when necessary. Monitoring occurs as often as needed, but at least annually, and includes collaboration between medical and mental health providers. Areas of focus include:

1. Exchange of information between medical (e.g. PCPs, medical/surgical specialists, organization providers) and mental health providers, in accordance with a member's right to confidentiality of protected health information.
2. Appropriate diagnosis, treatment and referral of mental health and substance use disorders.
3. Appropriate use of psychotropic medications.
 - a. Pharmacy data is analyzed and reviewed to ensure appropriate use and adherence to prescribing guidelines for psychotropic medications (e.g. anti-depressants, ADHD medications, etc.) for both acute and continuation of therapy.
4. Management of coexisting medical and mental health conditions.

Scripps Health Plan

2026 Utilization Management Program Description

- a. Review appropriate use of psychotropic medications and adherence to guidelines for prescribing are reviewed using pharmacy data on issues around management of multiple conditions where there are both medical and mental health conditions and management across the continuum of care is an issue.
 - b. Appropriate screening and management of members with co-occurring medical and mental health disorders.
- 5. Prevention programs for mental healthcare.
 - a. Collaborative development and implementation of primary or secondary prevention programs (i.e. autism or depression screening) for mental healthcare which are based on professionally recognized standards of care.
- 6. Severe and persistent mental illness.
 - a. Continuity and coordination of services for members with severe and persistent mental illness is monitored.

SHP retains full responsibility for assuring continuity and coordination of care, in accordance with the requirements of this subsection, notwithstanding that, by contract, it has obligated a specialized HCSP to perform some or all of these activities.

Committee Oversight

A psychiatrist or qualified mental health representative will be a member of the MMC for coordination of medical and mental health care. Utilization of mental health and substance use disorder services are reviewed through the MMC and any sub-committees that are formed to address any quality or access to care issues.

Access to Care

Members requiring medically necessary treatment of mental health and substance use disorders, including those identified in the International Classification of Diseases or the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders, are designated as special needs members by SHP and provided direct access to services. Members have the right to access any network provider directly in the case of any exacerbations, without authorization or referrals that may act as barriers to care. If services for the medically necessary treatment of a mental health or substance use disorder are not available in the network within the geographic and timely access standards set by law or regulation, SHP shall arrange coverage to ensure the delivery of medically necessary out-of-network services and any medically necessary follow-up services that, to the maximum extent possible, meet those geographic and timely access standards.

Case Finding and Screening

CCM will review claims annually, at a minimum, to identify special needs members. During the year, referrals, reporting of utilization and ongoing monitoring may be used to identify members meeting the definition of special needs and outreach conducted. SHP sites have implemented a depression screening into the

Scripps Health Plan

2026 Utilization Management Program Description

member visit record for early identification and intervention of at-risk members.

Referral Management and Prospective Review

Referral management involves an assessment of the medical necessity, including evaluation of the proposed treatment plan, appropriateness of practitioner type/setting/level of care and benefit coverage, prior to the delivery of care by a medical practitioner. This process is initiated by the member's PCP or other treating physician prior to delivery of the care. SHP uses established criteria based on nationally recognized evidence-based medical and practice standards used to review referral requests. If considered medically necessary, the referrals are approved.

1. SHP retains the right to exempt certain providers (e.g., place a physician on authorization auto-approval) or diagnoses from referral management. Decisions to exempt services from the need for prior authorization are made through the Prior Authorization Operations Committee which reviews the risk and data based upon previous decision-making history to determine if a service or provider meets internal guidelines to be exempt. The physician leadership make up the membership of this committee which meets at least quarterly and reports to the MMC. The purpose of this group is to decrease barriers to care and allow direct access to services for members.
2. Selected referral categories and referral types may not require authorization when requested by a PCP for a group-contracted physician and services directed to a specific group of providers.
3. For referrals to contracted or non-contracted specialty physicians outside a member's medical group, PCPs or other treating physicians are required to request prior authorization from the SHP UM Department.
4. Services must be provided by participating (in-network) providers except when those services are not available within SHP's contracted network or if specific conditions are met.
 - a. Out-of-network referrals may be authorized if the service requested by the member's PCP or other treating physician is not available from a participating network provider. The services must be medically necessary and a covered benefit to be considered.
 - b. Review by a Medical Director, Qualified Physician or Appropriate Licensed Clinical Reviewer for determination of Medical Necessity is required when:
 - ii. Member has a qualifying continuity of care
 - ii. Second or third opinion to an out of network provider
 - iii. Follow up healthcare treatment for services provided by an out of network provider, such as following rape or sexual assault, in circumstances where timely access to services is unavailable within the contracted network. Pursuant to AB 2843, these services include an application of the nine-month coverage period and the prohibition of any conditions on coverage related to the filing of a police report, criminal charges against an assailant, or the conviction of an offense

Scripps Health Plan

2026 Utilization Management Program Description

5. Medical necessity will be determined by reviewing the member's condition, diagnosis and the proposed treatment plan against the adopted nationally recognized criteria approved by the MMC.
6. SHP UM staff verifies eligibility and benefits as described in policy *SHPS 852: Benefit Verification* and coordinates referral management requirements.
7. Providers may request authorizations telephonically (orally) at **844-337-3700**, via fax at **858-260-5877**, directly via Epic (Scripps electronic health care record) interface with the UM Department or electronically via a provider's Scripps-Link (Plan Link) account portal. SHP maintains telephone access for providers and members to verbally request authorization for health care services.
8. Medical Director, Qualified Physician or Appropriate Licensed Clinical Reviewer reviews all referral requests that do not meet medical criteria and make the final medical necessity denial determinations. All denials are made by qualified health care professionals.
9. SHP complies with all referral decision-making timeframe standards for turnaround times as outlined by the state of California.
10. The PCP or other treating physician should submit a request for authorization approval to SHP before scheduling any service requiring prior authorization. Non-contracted providers who wish to request authorization for services must contact the prior authorization before scheduling the service. Refer to policy *SHPS 878: Communication Services for Providers and Practitioners* for details on accessing authorization services through telephone or the portal.
11. If authorized, notification to the requesting provider and specialist will be made within twenty-four (24) hours of the decision, specifying the specific services approved. Services shall be authorized as medically necessary for proposed treatment, of a duration not to exceed one (1) year at a time, utilizing established criteria and consistent with benefit coverage.
12. The PCP retains the responsibility for coordinating the member's care unless a specific arrangement is made to transfer care to the specialist for a specified period of time, in accordance with the PCP contract with SHP.

Standing Referrals

Members who require specialized care over a prolonged period for a life-threatening, degenerative or disabling condition, including human immunodeficiency virus (HIV) or acquired immune deficiency syndrome (AIDS), and active treatment for cancer may be allowed a standing referral to a specialist who has expertise in treating the condition or disease, or for the purpose of having the specialist coordinate the member's healthcare.

1. Specialists and specialty care centers are validated to ensure the provider holds appropriate accreditation or designation as having special expertise in treating the condition or disease (*refer to credentialing policy SHPS 400: Credentialing & Re-Credentialing*).
2. A list of HIV/AIDS specialists, as defined by Title 28 CCR § 1300.74.16, is reviewed and updated

Scripps Health Plan

2026 Utilization Management Program Description

annually, distributed to UM, Case Management, and Provider Relations staff, and maintained in easily accessible shared files.

3. A listing of specialists and specialty care centers, including HIV/AIDS specialists, is available to providers and members via the plan website to assist in the referral process.
4. The PCP can request authorization for an out-of-network specialist if one is not available within SHP's network, who can provide appropriate specialty care to the member as determined by the PCP in consultation with SHP's Medical Director and as documented in the treatment plan.
5. The PCP and specialist determine the need for continuing care from the specialist and request authorization based on an agreed-upon treatment plan, if any. Treatment plans may limit the number of specialist visits or the length of time the visits are authorized and may require the specialist to make regular reports to the PCP.
6. The PCP retains the responsibility for coordinating care unless a specific arrangement is made to transfer care to the specialist for a specified period of time, in accordance with the PCP agreement with SHP. In certain cases, such as members with special health care needs or obstetric care, the specialist may act as the primary care provider.
7. Determinations are made within the regulatory timeframes for turnaround times when the request for determination of the requested service is made by the member or the member's PCP and all appropriate medical records and other items of information necessary to make the determination are provided.
8. After receiving the standing referral approval, the specialist is authorized to provide healthcare services that are within the specialist's area of expertise and training to the member in the same manner as the PCP.
9. When authorizing a standing referral to a specialist for the purpose of the diagnosis or treatment of a condition requiring care by a physician with a specialized knowledge of HIV/AIDS medicine, SHP will refer the member to an HIV/AIDS specialist who meets California Health and Safety Code criteria.
10. Member denial letters for standing referrals will include:
 - a. Health-literate description of the service being requested.
 - b. Clear and concise explanation of the reasons for the denial or modification of the originally requested service.
 - c. Clinical reasons for the decision to deny, delay or modify health care services.
 - d. The rationale or criteria the decision was based upon; and
 - e. The member's rights to appeal the decision and how to do initiate an appeal.
11. Written communications to members regarding denial, delay or modification of a request shall include

Scripps Health Plan

2026 Utilization Management Program Description

information as to how the member may:

- a. File a grievance with SHP; and
 - b. Request an independent medical review in cases where the member believes that health care services have been improperly denied, modified or delayed by SHP, or by one of its contracting providers.
12. Written communications to a physician or other health care provider of a denial, delay or modification of a request shall include the following information:
- a. The name of the health care professional responsible for the denial, delay or modification; and
 - b. The direct telephone number or an extension of the healthcare professional responsible for the denial, delay or modification to allow the easy contact by the requesting provider.

Second Opinions

A member or their treating provider may request a second opinion if:

1. The member questions the reasonableness or necessity of a recommended surgical procedure.
2. The member questions the diagnosis or plan of care for a condition that threatens loss of life, limb, bodily functions, or substantial impairment, including a serious chronic condition.
3. The clinical conditions is unclear or complex and confusing, a diagnosis is in doubt due to conflicting test results, or the treating provider is unable to diagnosis the condition.
4. The treatment plan in progress is not improving the medical condition within an appropriate timeframe given the diagnosis and plan of care.
5. The member has attempted to follow the plan of care or consulted with the initial provider regarding serious concerns about the diagnosis or plan of care.

The member will be responsible only for the cost of applicable co-pays in accordance with the Combined Evidence of Coverage and Disclosure Form (EOC). Requests by a member, their PCP or another treating physician for a second opinion will be considered by the Medical Director, Qualified Physician or Appropriate Licensed Clinical Reviewer and the member will be directed to a participating provider or, if unavailable in-network, to a provider selected by the member.

Emergent Care

Emergent care does not require prior authorization. All emergency room care will be covered without prior authorization.

Scripps Health Plan

2026 Utilization Management Program Description

In the case of an emergent admission, the UM Department must be notified following stabilization of an emergent medical condition. The concurrent review process begins at that time.

All pre-service requests for urgent services (expedited referrals) will be reviewed, and decision will be made within twenty-four (24) hours of receipt for medical necessity.

Denial of Experimental Treatment for Terminally Ill Members

A terminal illness is defined as an incurable or irreversible condition with a high probability of causing death within one (1) year or less.

Life threatening diseases or conditions are defined as those where the likelihood of death is high unless the course of the disease is interrupted and diseases or conditions with potentially fatal outcomes, or where the end point of clinical intervention is survival. Seriously debilitating diseases or conditions are defined as causing major irreversible morbidity.

If an authorization or referral is requested for coverage of investigational or experimental treatment, services, or supplies, the case will be immediately forwarded to a Medical Director, Qualified Physician or Appropriate Licensed Clinical Reviewer for consideration.

When SHP denies coverage of a request for treatment, services, or supplies deemed experimental and recommended by a participating plan provider for a member with a terminal illness, all of the following information will be provided to the member within five (5) business days of receiving the request:

1. A statement outlining the specific medical and scientific reasons for denying coverage.
2. A description of alternative treatment, services, or supplies covered by SHP, if any.
3. Copies of the grievance procedures and the Terminal Illness Complaint Form. SHP Terminal Illness Complaint Form provides an opportunity for the member to request a conference as part of SHP grievance system.
 - a. Upon receiving a Terminal Illness Complaint Form requesting a conference, the member will be given an opportunity to attend a conference, to review the reason for denial, within thirty (30) calendar days. The Medical Director or designee representative attending the conference will have authority to determine the disposition of the appeal.
 - b. SHP allows attendance, in person, at the conference, by a member, a designee of the member, or both. If the member is a minor or incompetent, the parent, guardian, or conservator of the member, may attend as appropriate.
 - c. The conference may be scheduled within five (5) business days if the treating physician determines, that based on standard medical practice, the effectiveness of either the proposed treatment, or any alternative treatment, services, or supplies covered by SHP, would be materially reduced if not provided at the earliest possible date.

Scripps Health Plan

2026 Utilization Management Program Description

Retrospective Review

Retrospective review may be performed in the following circumstances:

1. Emergent care will be retrospectively reviewed for medical necessity, appropriateness, initiation of further UM activity, and for identification of educational opportunities.
2. Identified potential quality-of-care concerns.
3. Identify and analyze trends requiring potential further study.
4. Service has been provided and a claim submitted without prior authorization or approval.
5. As part of a claims review to match the authorization of services to charges received.
6. For high dollar cases that exceed usual and customary charges.

UM Key Service and Administrative Performance Indicators

SHP will monitor indicators measuring performance in key areas of the UM Department. Results will be assessed and reported to the MMC and MAC quarterly. Data will be analyzed to identify trends related to overutilization or underutilization of services and to develop interventions to correct adverse trends, evaluate those interventions, and make changes as needed to optimize outcomes and achieve goals.

UM will review the demographics related to health care and social determinants of health for the health plan population, processes, and resources as needed to meet members' needs and identify improvement opportunities. The indicators will be objective, measurable, reviewed by the MMC and MAC annually, and revised as needed.

A performance goal will be established for each indicator. Multidisciplinary teams will analyze performance gaps and develop action plans. Monitoring results for these indicators will be reported to the MAC semi-annually and included in the semi-annual program evaluation.

1. Bed days per 1,000 (acute, long-term acute care (LTAC), and skilled nursing facility (SNF)).
2. Admissions per 1,000 (acute, LTAC, and SNF).
3. Average Length of Stay (acute, LTAC, and SNF).
4. Acute, LTAC, and SNF readmission rates.
5. Authorization and referral decision turnaround times.
6. Number and trends of service denials and appeals.
7. Staff and physician consistency of criteria application audit results (inter-rater reliability report).

Scripps Health Plan

2026 Utilization Management Program Description

8. Delegation oversight activity.
9. CCM outcomes.

New Medical Technology or New Applications of Existing Technologies or Medications

SHP will monitor the use of new medical technologies including, but not limited to, medical and surgical treatments and procedures, pharmaceuticals, and medical equipment, as described in SHP's policies and procedures using appropriate nationally recognized criteria or literature. SHP reviews requests for new technologies using Hayes Technology Experimental & Investigational, which are national guidelines that are reviewed and updated annually.

Consistency of Criteria Application Process

SHP ensures consistent application of UM criteria by all UM Nurses and Qualified Physician or Appropriate Licensed Clinical Reviewers through periodic inter-rater reliability (IRR) assessments and reviews of completed authorization decisions. SHP conducts quarterly audits of referral and authorization files to evaluate compliance with regulatory requirements, adherence to approved criteria, and alignment with SHP's UM decision-making processes. The audit scope may include prospective, concurrent, and retrospective review decisions.

Individualized feedback and performance improvement opportunities are provided to UM Nurses, non-clinical UM staff, Qualified Physician and Appropriate Licensed Clinical Reviewers based on audit findings. Summary audit results, identified trends, and required corrective actions are reported to the MMC for monitoring and oversight.

The Medical Director and the Director of Utilization Management will collaborate to develop and monitor corrective action plans as needed. Refer to policy *SHPS 816: Interrater Reliability Audits* for additional details on this process.

IX. Authorization and Referral Responsibilities

Turnaround Time

Authorization and referral activities within the scope of the UM program turnaround time will be least quarterly and reported to MMC. SHP will comply with the most current Health Industry Collaboration Effort (HICE) commercial turnaround time standards. The MMC will evaluate results quarterly to identify opportunities for improvement to ensure authorization processes do not impede SHP's or providers' ability to schedule appointments within timeframes established by Timely Access and Network Reporting Statutes and Regulations.

The following actions and responsibilities are part of the authorization and referral process:

- A. SHP Responsibility:

Scripps Health Plan

2026 Utilization Management Program Description

1. Verify eligibility and benefit coverage.
2. Ensure that requested facilities, physicians and other providers are participating SHP providers whenever possible.
3. Evaluate medical necessity, proposed place of treatment and treatment plan.
4. Coordinate with UM staff on the admission of a member to a non-participating hospital, if applicable.

B. SHP Medical Director Responsibilities:

1. Monitor compliance with the UM program authorization and referral criteria.
2. Ensure that internal and external corrective actions are taken when problems are identified.
3. Oversee the review of authorization and referral requests along with clinical documentation prior to issuance of a denial based on lack of medical necessity.
4. Oversee the review of medical necessity denials and obtain specialist physician review for questionable or difficult cases. Physician consultants from the appropriate specialty areas of medicine and surgery who are certified by the ABMS will be utilized as needed.
5. Coordinate and communicate information and decisions to network physicians.

C. Physician Responsibilities:

1. The PCP is responsible for submitting referrals to the UM Department and obtaining approval prior to rendering services for assigned members in accordance with SHP policies.
2. Contracted providers involved in treating the member are also responsible for obtaining authorization approval in accordance with SHP policy.
3. Failure to obtain required authorization may result in denial of claims for these services.

D. Hospital Responsibilities (may vary based on specific contractual arrangements with each facility):

1. Ensure that authorization approval is obtained for all planned admissions for SHP members. Authorization approval is evidenced by a notice issued by the UM Department.
2. If the hospital contacts the UM Department to verify authorization approval for a service and finds that one has not been obtained, the UM staff will contact the PCP or other treating physician and coordinate the review process for the hospital.
3. Hospitals shall notify SHP of all emergent admissions upon stabilization of the member's emergent condition so SHP can begin the concurrent review and discharge planning process. SHP will accept notification that is greater than one business day when the facility had a delay

Scripps Health Plan

2026 Utilization Management Program Description

determining the member's eligibility. The burden of proof that the facility could not determine the member's eligibility falls on the facility.

X.Clinical Guidelines/Review Criteria

SHP utilizes MCG™ and other professionally recognized clinical care guidelines when making authorization decisions. Additionally, SHP may refer to guidelines published by Up-to-Date, Hayes Technology Assessment, and internally developed guidelines adopted by the MMC. Practice guidelines are adopted from the Agency for Healthcare Research and Quality (AHRQ) National Guideline Clearinghouse to ensure evidence based clinical practice guidelines and preventive care.

The clinical guidelines used by SHP are:

1. Evaluated and updated, annually in accordance with generally accepted standards of medical practice.
2. Consistent with sound clinical principles and processes.
3. Clinically appropriate in type, frequency, extent, site and duration and considered effective for the covered individual's illness, injury or disease.
4. Developed with input from actively practicing health care providers and not primarily for the convenience of the covered individual, physician or other health care provider.
5. Not more costly than an alternative service or sequence of services that is equally efficacious for the diagnosis or treatment of that covered individual's illness, injury or disease.
6. Are disclosed by SHP to providers, members and the public upon request.

SHP uses MCG™ national guidelines that are reviewed and updated at least annually or when there is a change in guidelines that are nationally adopted.

The clinical care guidelines are based upon established national guidelines, where available, scientific literature, and prudent practice. Guidelines are peer reviewed and developed by consensus. Clinical guidelines will be reviewed and adopted by SHP's MMC for use as appropriate within SHP's health care delivery system.

Based on the guidelines produced, the MMC will develop medical criteria and performance measures for monitoring and evaluation of care provided to members. The MMC may appoint multi-disciplinary sub-committees to develop guidelines and criteria when available clinical guidelines do not have specific criteria. These sub-committees will have representation consistent with services provided and provider panel membership.

In selecting topics for guideline development when clinical guidelines are not in place, SHP will consider:

1. High-volume and/or high-risk services.

Scripps Health Plan

2026 Utilization Management Program Description

2. Procedures with unexplained variations in services.
3. Procedures used in the prevention, diagnosis, treatment, management, or outcomes related to the clinical condition; and
4. The cost of the condition to SHP and members.

Information regarding criteria for appropriateness of medical services is available upon request from participating providers. Information regarding criteria for appropriateness of mental health services is also available from the Mental Health Services Administrator.

Guidelines will be provided to providers as they are developed and revised through educational sessions, mailings, newsletters, and/or updates to provider manuals. When applicable, newly developed or revised guidelines may also be provided to members through special mailings.

SHP will inform contracted providers, members, and the public of the criteria or guidelines used to make UM decisions to authorize, modify or deny services upon request. Criteria used as the basis of a decision to authorize, modify, or deny services in a specific case under review will be disclosed to the provider, member, or public upon request. Dissemination of criteria or guidelines will include the following disclosure notice:

"The materials provided to you are guidelines used by this Provider Group to authorize, modify, or deny care for persons with similar illness or conditions. Specific care and treatment may vary depending on individual need and the benefits covered under your contract."

The SHP Provider Manual will include instructions for providers to utilize in requesting this information or assisting members in obtaining this information. Where appropriate, member communications and educational materials will include instructions on requesting this information.

XI. Utilization Review Decisions Timeframes

SHP ensures that UM program processes for review and approval, modification, delay, or denial of medical and mental health care services, and medical necessity denials are consistently applied and will not interfere with or cause delay in service or preclude delivery of services.

SHP ensures that all medical necessity requests, prior to or concurrent with the provision of health care services, shall be made in a timely fashion appropriate for the nature of the member's condition, not to exceed five (5) business days from the receipt of the information reasonably necessary and requested by the utilization review process to make the determination. Pharmacy determinations are made within twenty-four (24) hours for urgent/expedited requests and seventy-two (72) hours for standard requests. A detailed explanation of utilization review decision timeframes areis further described in policies *SHPS 875: UM Turn Around Time Standards*.

When the member's condition is such that the member faces an imminent and serious threat to their health, including, but not limited to, the potential loss of life, limb, or other major bodily function, requiring expedited

Scripps Health Plan

2026 Utilization Management Program Description

review SHP's decision to approve, modify, or deny requests prior to, or concurrent with, the provision of health care services shall be made in a timely fashion appropriate for the nature of the member's condition, not to exceed seventy-two (72) hours after the receipt of the information reasonably necessary and requested to make the determination.

The Medical Director provides oversight of all Utilization Management decisions, and a Qualified Physician or Appropriate Licensed Clinical Reviewers is responsible for reviewing and rendering all denial determinations in accordance with applicable DMHC and NCQA requirements.

For mental health services, SHP requires the involvement of a psychiatrist or other licensed mental health professional in decisions to deny or modify mental health services.

SHP ensures that upon receipt of the information, all decisions to approve, modify or deny requests will be communicated to the provider(s) within twenty-four (24) hours and members within one (1) calendar day of making the determination.

SHP ensures that communications to providers regarding decisions to approve a request will specify the health care service approved, name of provider or facility approved, the number to call to coordinate care, and volume of services approved (if applicable).

SHP ensures care is not unduly delayed for medical conditions requiring time sensitive services and complies with regulatory required timeframes that are reasonably necessary to make the determination.

SHP will abide by the timeliness standards for medical determinations and notification of members and providers as referenced in the HICE UM Timeliness Standards for commercial members at https://www.iceforhealth.org/library/documents/ICE_UM_TAT_Commercial_Standards_070116.doc

SHP will send communication to the member and physician if a decision to approve, modify, or deny the request for authorization will not be made within five (5) business days due to:

1. SHP not having received all of the information reasonably necessary and requested.
2. SHP requires consultation by an expert reviewer, or
3. SHP requesting an additional examination or test, provided the test is reasonable and consistent with professionally recognized standards of medical practice, be performed upon the member.

SHP shall immediately, upon the expiration of the timeframe, or as soon as the utilization reviewer becomes aware, they will miss the timeframe, whichever comes first, notify the provider and the member in writing of the following:

1. That SHP cannot make a decision to approve, modify, or deny the request for authorization within the required timeframe.
2. The anticipated date on which a decision may be rendered and include the following information:
 - a. Specify the information requested but not received.

Scripps Health Plan

2026 Utilization Management Program Description

- b. The expert reviewer to be consulted, or
- c. The additional examinations or tests required.

XII. Benefit Determinations

UM staff check benefit coverage of requests using the member enrollment data and benefit coverage. When a benefit is not covered, a denial can be issued by the UM staff. Benefit determinations include the following.

- A. Services in the member's benefit plan that are limited by number, duration, or frequency in the member's benefit plan.
- B. Extension of treatments beyond the specific limitations and restrictions imposed in the member's benefit plan.
- C. Care or services that do not depend on any circumstances, such as the member's medical need or a practitioner's order.
- D. Requests for personal care services, such as cooking, grooming, transportation, cleaning and assistance with other activities of daily living (ADL).
- E. Services or procedure that are excluded from coverage from the benefit plan.

Exceptions can be made to the benefit plan for coverage by the medical group. All benefit coverage denials based on a diagnosis are referred to the Qualified Physician or Appropriate Licensed Clinical Reviewer for determination. The existence of pre-existing conditions is not a consideration in benefit coverage determinations.

XIII. Medical Necessity Determination Process

UM staff will obtain and review necessary clinical information and use clinical guidelines and criteria approved by the MMC which is based on professionally recognized standards of practice along with their clinical expertise to determine the medical necessity of proposed care. The UM staff will consider the following factors when applying criteria to a given individual, including age, co-morbidities, complications, progress of treatment, psychosocial situation, and home environment (when applicable). Only information needed to make determinations will be collected. The UM decision-making process will not be overly burdensome for the member, the practitioner, or the health delivery staff. Characteristics of the local delivery system available to members, such as skilled nursing or subacute care facilities and home care to support the member following hospital discharge, as well as the ability of local hospitals to provide all recommended services within the estimated length of stay must be considered.

Decisions about the following services require medical necessity review:

- 1. Covered medical benefits are defined by the Evidence of Coverage (EOC) or Summary of Benefit Description (SBD).

Scripps Health Plan

2026 Utilization Management Program Description

2. Preexisting conditions when the member has creditable coverage and the EOC, SBD, or HCSP includes a policy to deny preexisting care or services.
3. Care or services for which coverage depends on specific circumstances.
4. Dental surgical procedures occurring within or adjacent to the oral cavity or sinuses and are covered under the member's medical benefits.
5. Out-of-network services covered only in clinically appropriate situations, including but not limited to cases where the member has a specific need that requestor believes cannot be met in-network, a service or procedure not provided in network or delivery of services are closer or sooner than provided or allowed within the access and availability standards.
6. Prior authorizations for pharmaceuticals and pharmaceutical requests requiring a prerequisite drug for a step therapy program.
7. Requests for services considered "experimental" or "investigational" .

If the UM staff cannot approve the proposed care based on the available information, they will refer the case to the Qualified Physician or Appropriate Licensed Clinical Reviewer for review and determination of medical necessity. This includes modifications to requests.

XIV. Denial and Modification Determinations

- A. When the UM staff are unable to approve proposed care or need to modify proposed care, a physician (or pharmacist for denial or modification of a prescription drug) must review the request and any available clinical information, prior to issuing of any denial or modification based on lack of medical necessity. As a part of the review, the Qualified Physician or Appropriate Licensed Clinical Reviewer may discuss the case with the attending physician. Refer to policies *SHPS 809: Denials and Modifications* and *SHPS 875 UM Turnaround Times* for additional information.
- B. Written notification to deny, delay or modify a request to a physician or other health care provider must include:
 1. A clear and concise written explanation for the decision to deny, delay, or modify health care services.
 2. A description of the criteria and/or guidelines used to make the final determination to deny, delay, or modify health care services.
 3. The clinical reason(s) for the decision to deny, delay, or modify health care services regarding medical necessity in easily understandable language.
 4. The name and the direct telephone number of the provider/practitioner responsible for the denial, delay, or modification.

Scripps Health Plan

2026 Utilization Management Program Description

5. Information on how to request an IMR if the member believes that health care services have been improperly denied, modified, or delayed.
6. Information as to how the member may file an appeal or grievance with SHP. including:
 - a. Submit an appeal within one hundred eighty (180) days through SHP's grievance/appeal process.
 - b. Appeal to the DMHC Help Center for assistance or help in appealing the decision through IMR if not satisfied with the decision made by SHP.
 - c. A written copy of the criteria or benefit provision used in the decision upon request.
 - d. Notification that the member may be represented by anyone they choose, including legal counsel, a friend, or other spokesperson, and have that representative act on their behalf at all levels of appeal.
 - e. Submit written comments, documents, or other information relevant to the appeal.
 - f. Request continuation of benefits pending the resolution of the appeal and instructions on how to request continued benefits.
 - g. The method for obtaining a fair hearing to contest the denial, deferral, or modification action and the decision that SHP or the delegate has made.
- C. Administrative denials that occur during the utilization review process for reasons other than medical necessity do not require review by a physician. Administrative denials may be made for:
 1. The member lacks eligibility with SHP.
 2. The requested service is a non-covered benefit.
 3. The requested service can be approved but must be rendered by an in-network provider
- D. On a retrospective review of claims for non-authorized care (i.e. not previously submitted for authorization or referral review), a denial may be issued for the following reasons:
 1. The services were non-covered benefits.
 2. The member was not eligible for SHP benefits at the time care was provided.
 3. The care was not medically necessary (as reviewed by a Qualified Physician or Appropriate Licensed Clinical Reviewer).
 4. Lack of prior authorization in circumstances where the provider has demonstrated a pattern of failing to obtain authorization prior to rendering the service. The provider will be instructed that the member will not be held financially responsible for the services in these cases.

Scripps Health Plan

2026 Utilization Management Program Description

- E. On a retrospective review of claims for approved care, payment for services may be denied if it is found that information previously given in support of the approval was erroneous or the actual care provided was inconsistent with the care requested and approved and not medically necessary as determined by medical review.
- F. A written denial notice of the decision for standard and emergent requests is provided to the ordering provider and the member, which includes, but is not limited to, the following:
 - 1. The member or member's legal guardian, if the member is a minor or an incompetent adult.
 - 2. The facility, if applicable.
 - 3. The requesting physician or specialist, as applicable.
 - 4. The member's PCP.
- G. Denial determinations for emergent service requests will be communicated to requesting provider(s) initially by telephone, facsimile, or electronic mail, and then in writing within twenty-four (24) hours of making the decision.
- H. All determinations to deny, delay, or modify a request will be sent to the member in writing, via regular mail or MyScripps patient portal. This written notice shall include:
 - 1. A clear and concise written explanation for the decision to deny, delay, or modify health care services.
 - 2. A description of the criteria and/or guidelines used to make the final denial determination to deny, delay, or modify health care services.
 - 3. The clinical reason(s) for the decision to deny, delay, or modify health care services regarding medical necessity in easily understandable language.
 - 4. Information on how to request an IMR in cases where the member believes that health care services have been improperly denied, modified, or delayed.
 - 5. Notice of availability of translation and interpreter services.
 - 6. Information on how the member may file a grievance or appeal with SHP, including:
 - a. How to appeal within one hundred eighty (180) days through SHP grievance/appeal process.
 - b. How to appeal to the DMHC Help Center for assistance or help in appealing the decision through IMR if not satisfied with the decision made by the Plan.
 - c. A written copy of the criteria or benefit provision used in the decision upon request.
 - d. Notification that the member may be represented by anyone the member chooses including legal

Scripps Health Plan

2026 Utilization Management Program Description

counsel, friend, or other spokesperson, and have that representative act on their behalf at all levels of appeal.

- e. Submit written comments, documents, or other information relevant to the appeal.
- f. Request continuation of benefits pending the resolution of the appeal and how to request continued services.
- g. The method for obtaining a fair hearing to contest the denial, deferral, or modification action and the decision that SHP or the delegate has made.

I. Notifications of initial determinations:

- 1. Utilization review decisions will be communicated to requesting providers initially by telephone, facsimile, or electronic portal, in writing within twenty-four (24) hours of making the determination.
- 2. Notification for emergent utilization review requests will be made immediately following the determination by telephone and then in writing within twenty-four (24) hours of making the decision.
- 3. Notification for standard utilization review request notification will be made by telephone, facsimile, or electronically through in-basket messaging/ portal or electronic mail within twenty-four (24) hours of making the decision and then in writing within two (2) business days.
- 4. Providers with direct view access to the electronic referral management system are expected to monitor the authorization request status online and arrange for services to be rendered immediately upon update of the request to an approved status in the system. It is the responsibility of the provider to notify the member telephonically and establish an appointment for the approved service.
- 5. For initial determinations on retrospective authorization requests, SHP will provide written notification of denials to practitioners and members within thirty (30) calendar days of making the decision.
- 6. To inform practitioners of how they may contact a Qualified Physician or Appropriate Licensed Clinical Reviewer to discuss a denial determination, all written denial notifications to the practitioner will include the name and phone number of the Qualified Physician or Appropriate Licensed Clinical Reviewer. If a denial has been issued due to lack of necessary information and the requesting provider calls and submits the information, the practitioner who issued the initial denial may review the case with the new information and reverse the decision. This is not considered an appeal case by NCQA.

XV. Language Assistance Program

- A. SHP provides qualified medical interpreters at no cost to members whenever a language or communication barrier exists. Interpretive services are accessible by phone twenty-four (24) hours a day, seven (7) days a week.

Scripps Health Plan

2026 Utilization Management Program Description

- B. Written materials will be available for each eligible limited English proficient (LEP) language group that constitutes 5% of the member population served (based upon the annual member language assessment). Written vital documents include:
1. Applications.
 2. Consent forms, including any form by which a member authorizes or consents to any action by SHP.
 3. Letters containing important information regarding eligibility and participation criteria.
 4. Notices pertaining to the denial, reduction, modification or termination of services and benefits and the right to file a grievance or appeal.
 5. Notices advising LEP members of the availability of free language assistance and other outreach materials that are provided to members.
 6. SHP's Explanation of Benefits or similar claim processing information that is sent to a member if the document requires a response from the member.
 7. All member disclosures.
- C. The member's preferred language for medical communication will be documented in the member's record for communication to staff. Staff will utilize interpretive services when providing critical medical communications. Providers are encouraged to access interpretive services at any time to support member communication. Communications considered "critical", or medical in nature, generally include, but may not be limited to:
1. Consent and/or acknowledgement of information discussion.
 2. Advance directive discussion.
 3. Resuscitation or do not resuscitate discussion.
 4. Explaining any diagnosis and plan for medical treatment.
 5. Explaining any medical procedures, tests, or surgeries.
 6. Initial and discharge medication education.
 7. Member complaints, appeals and grievances.
 8. Discharge instructions.
- D. Members may, after being informed of the availability of interpreters qualified to interpret medical information at no charge, select an individual of their choice to assist with their communication needs. Member refusal of SHP interpretive service should be documented in the member's record in addition to the name of the individual that the member had selected to perform interpretation. Staff members may

Scripps Health Plan

2026 Utilization Management Program Description

access a SHP medical information interpreter if at any time they feel there is a communication barrier with the interpreter selected by the member.

- E. Notices advising members and families of the availability of translation and interpreter services at no cost, procedures for obtaining assistance, and lodging complaints are included in service determination letters sent to members to deny or modify a requested service. Procedures for obtaining assistance and lodging complaints are displayed in public areas on the patient rights posters and Member Rights and Responsibilities handouts.
- F. Education on interpretive services is provided during new employee orientation, annually through the Learning Management System (LMS) and in department meetings.
- G. Member complaints and concerns must be directed to the appeals and grievances team.
- H. Responding to a member requesting translation of any non-standard vital document by customer service representative (CSR):
 - 1. CSR enters a customer relations module ticket (CRM) in Epic for interpreter or translation request.
 - 2. If the member cannot communicate effectively in English, the CSR will attempt to verify the member's preferred spoken language. While the member is holding, the CSR contacts the interpreter services line and reconnects the member once connected to an interpreter.
 - 3. The CSR retrieves the letter or document requested and submits to customer service leads to be translated by Cyracom.
 - 4. The CSR notifies caller that the letter will be sent to the vendor for translation. Customer service leads are responsible for sending the document to the vendor within the timeframes below:
 - a. Urgent request or service: One **(1) business day**.
 - b. Non-urgent or post-service request: Two **(2) business days**.
 - 5. The CSR documents in the CRM when it was sent, the number and names it was faxed to.
 - 6. The CSR also documents if the member refuses the translation service.

XVI. Appeals

SHP has developed its grievance and appeal system so that it ensures adequate consideration of members' grievances and appeals in accordance with statutory requirements of Section 1368 et seq. of the California Knox-Keene Health Care Service Plan Act of 1975 as amended and Rules 1300.68 and 1300.68.01 of Title 28 of the California Code of Regulations.

Members are entitled to have their appeals heard through a grievance and appeal process and have a contractual right to arbitrate issues that are not resolved to the member's satisfaction. SHP's appeal process

Scripps Health Plan

2026 Utilization Management Program Description

provides a written acknowledgment of a member's routine grievance or appeal within five (5) days of receipt. SHP's appeal process shall provide for the receipt, handling, and resolution of appeals within thirty (30) days of receipt. SHP's grievance system allows members to file appeals for at least one hundred eighty (180) calendar days following any event or action that is subject to the member's dissatisfaction.

Members also have the right to submit their appeal to the Department of Managed Health Care's Help Center or the independent medical review (IMR) system. The case is considered "pending" until a resolution is achieved. Written documentation begins the date the appeal is received in SHP's office. Upon conclusion/resolution, the case file is complete with all dates and actions included.

Procedures are in place to escalate appeals for all urgent care needs 24/7 to the Medical Director and/or the Chief Compliance Officer, both having the authority to approve medical care for SHP members. For expedited appeals, SHP will acknowledge the appeal within twenty-four (24) hours of receipt. All levels of urgent appeals will be resolved and responded to within three (3) calendar days or less, upon receipt of the appeal. An urgent appeal is a case requiring expedited review because it involves an imminent and serious threat to the health of the member, including, but not limited to, severe pain, potential loss of life, limb or major bodily function, or if the member believes his/her enrollment has been or will be improperly canceled, rescinded or not renewed.

SHP's appeal process is designed to document and resolve member issues expeditiously and equitably in accordance with regulatory guidelines. To meet the required thirty (30) calendar day routine resolution timeframe, the SHP Appeals & Grievances team will document the substance of the appeal and any actions taken, fully investigate the issue, obtain the appropriate documentation from the providers involved, facilitate the Medical Director/same or similar specialist review (as applicable), and respond to the member with the determination and/or results of the investigation. Supporting documentation and findings may also be forwarded to QM staff for further review.

All appeals will be tracked, trended, prioritized, and reported at the MMC on a quarterly basis. The information presented in the reports will be sufficient, detailed, and inclusive of findings and action taken and identifies our internal or contracting provider components which could present as a significant or chronic quality of care issue. When trends are identified, the MMC will recommend an action plan.

SHP has Appeal and Grievance Information Integrity procedures in place to manage Appeal and Grievance decisions including but not limited to denial upholds based on medical necessity decisions, receipt date, written notification, recording date, modified dates, timeliness of Appeal and Grievances decisions, and notification history. These controls protect Appeals and Grievance data from unauthorized modification or being altered outside of prescribed protocols. Audit procedures are in place to monitor the effectiveness of information integrity as needed (at least annually). Any noncompliance is documented with oversight performed by SHPS Compliance department.

XVII. Delegation of UM Responsibilities

SHP may delegate responsibility for performing UM functions to contracted entities that meet SHP's standards for delegation. SHP will perform annual on-site or desktop audits of delegated entities to assure compliance with standards and to assure that the care provided by the delegated entity is based on

Scripps Health Plan

2026 Utilization Management Program Description

professionally recognized standards of practice. Delegation oversight will be performed by the Delegation Oversight Department under the direction of the Regulatory Oversight Committee. Although oversight of all UM activity is the responsibility of SHP MMC, medical groups with whom UM responsibilities have been delegated will maintain a quarterly UM Committee meeting to share SHP standards and MMC information. Delegation oversight activities include:

- A. A pre-delegation assessment to verify the delegation candidate has the appropriate mechanisms and processes in place to fulfill the UM responsibilities and meet the SHP standards for delegation. The assessment will include a review of the candidate's administrative capacity, technical expertise, budgetary resources, program policies and procedures, service capabilities, information integrity, and the clinical criteria/guidelines used in providing care to members and will be completed prior to delegated activities are performed.
- B. Annual on-site or desktop review and approval of the delegate's UM program, policies and procedures, evaluation, and documents used within the medical group. The annual audit will include a file review using NCQA methodology.
- C. Execution of a delegation agreement which describes functions delegated, areas of responsibility, oversight procedures and reporting requirements, as needed.
- D. At least semi-annual reports of delegation activity, including findings and actions taken as a result of UM activities, to the ROC and MAC. Delegated activities will also be addressed in the semi-annual report provided to the MAC.
- E. SHP ensures that the following requirements are met by each delegate:
 1. Provides documents necessary for SHP to conduct oversight such as:
 - a. UM Program Description.
 - b. UM and other relevant policies and procedures.
 - c. UM Workplans
 - d. UM Program Evaluation
 2. Has a designated Medical Director who holds an unrestricted license to practice medicine in California.
 3. The Medical Director's position description shall include substantial responsibility for providing clinical direction and oversight of the UM program.
 4. Has written criteria or clinical guidelines for UM decisions that meet the requirements and are clearly documented for each UM function along with the procedures for use and application of the criteria in making medical necessity determinations consistent with Section 1363.5 which must be:
 - a. Developed with involvement from actively practicing health care providers.

Scripps Health Plan

2026 Utilization Management Program Description

- b. Consistent with sound clinical principles and processes.
 - c. Evaluated and updated, if necessary, at least annually.
 - d. Disclosed by the delegate to providers, members, and the public upon request.
5. Submission of a UM Program Description and CCM Program Description (if applicable).
6. At least semiannual submission of UM statistics and CCM statistics (if applicable).
7. Annual submission of UM Information Integrity (System Controls) report.
8. UM statistics may include:
 - a. The number of UM cases handled by type (pre-service, urgent concurrent, or post-service) and by service (inpatient or outpatient).
 - b. Denials made and reasons for denial.
 - c. The number of cases appealed;
 - d. UM and Appeal rates; and
 - e. Turnaround times.
9. Annual audit of UM files such as reports on UM medical necessity denials, medical necessity and benefit appeals, hospital admissions, length of stay, referrals, denials and inpatient days per 1,000 members.
10. Evidence of performance of an annual evaluation and update of the delegate's UM program and evidence of review by the appropriate committee/s such as through committee meeting minutes and records of communication with the delegate.
11. Delegate's UM program has clear policies and procedures including utilization review processes such as pre-service, concurrent and retrospective review.
12. Delegate's UM program has a clearly stated policy that denials of coverage for reasons of medical necessity are made by a qualified licensed physician or health care professional.
13. Delegate provides telephone access for providers to request authorization for health care services.
14. Delegate's timeframes for UM decisions are within commercial regulatory standards and regulations complying with all applicable access standards and accessibility turnaround times.
15. Delegate provides timely responses in accordance to mandated timeframes for decisions and communication to both requesting provider and members.
16. Delegate's written notification for denials includes:

Scripps Health Plan

2026 Utilization Management Program Description

- a. Name and direct contact number for the professional responsible for a denial, delay, or modification of an authorization request.
 - b. Clear and concise explanation of the reasons for the delegate's decision, a description of the criteria used and clinical reasons for the decision regarding medical necessity.
 - c. Information on how to file a grievance with SHP and the DMHC and information on how to request an IMR.
17. Delegate assesses the quality of its UM program and processes and takes appropriate action when problems are identified.
18. Delegate has emergency health care services available and accessible within the service area twenty-four (24) hours a day, seven (7) days a week.
19. Delegate reimburses for emergency services provided to its members until the care results in stabilization of the member and the delegate shall not require a provider to obtain authorization prior to the provision of emergency services and care necessary to stabilize the member's emergency medical condition. Delegate denies reimbursement to a provider for a medical screening examination only in cases where the services and care requested were not an emergency. Delegate's monitoring of their UM and Appeals (if applicable) system controls at least annually to protect data from unauthorized modification and/or deletion.
- F. SHP oversees the delegate to ensure that the delegate is properly performing the functions. Corrective actions will be given for any element that does not meet SHP's threshold. SHP may de-delegate delegated functions at any time.
- G. SHP retains ultimate accountabilities for all functions delegated to another party. SHP has policies and procedures for monitoring its delegated entities including methodology and conducts regular oversight of the UM program for each of its delegated entities for compliance with its established UM standards.
- H. Refer to compliance policy **SHPS 1210 Delegation of Plan Responsibilities** for details of oversight activities and delegation agreement template.

XVIII. Confidentiality and Conflict of Interest

All aspects of UM activities including, but not limited to, related discussions, documentation, and committee minutes, are confidential and protected from disclosure under state and federal law. All SHP employees, committee members, and committee guests (as applicable) must understand and agree to comply with confidentiality policies. These individuals must sign a Conflict of Interest, Nondisclosure, and Nondiscriminatory Statement on an annual basis. Signed statements are maintained in the Scripps Health Learning Management System and by the SHPS Compliance Department.

UM records and member files are maintained within SHP's electronic health record (EHR). Any records not maintained within the EHR shall be maintained in SHP administrative offices and/or on a secure cloud-based repository. Correspondence to the member will be kept in the member's file.

Scripps Health Plan

2026 Utilization Management Program Description

Conflicts of interest include any nature of relationship with the beneficiary or the provider under review, including familial relationships, treating relationships, or other such close personal associations; currently having, or previously having had, a fiduciary relationship with a provider under review or the manufacturer or distributor of a drug, device, or other product under review; or having any other involvement in a case under review which has the capacity to impair the judgement of the reviewer in making or informing a determination. No person in the review process will review cases in which he/she was actively or personally involved. If a potential for conflict of interest is identified, another qualified reviewer will be designated. Where there is a conflict between consideration of cost and quality care, it will be the responsibility of the MMC to resolve the matter in favor of quality care.

Included in the Conflict of Interest, Nondisclosure, and Nondiscriminatory Statement, that is signed annually, is an attestation that individual reviewers are not financially incentivized, motivated, or otherwise rewarded for issuing modifications and/or denials of requested health care services and have not been offered any financial incentives that would encourage a decision that would result in underutilization or reduce or limit medically necessary care. This information is available to both members and providers via the SHP website. In addition, SHP distributes the affirmative statement about incentives annually to members and providers by mail, fax, or email.

XIX. Experience with the UM Processes [Member and Provider]

The MMC evaluates member and provider satisfaction with the UM program annually through member and provider satisfaction surveys. Assessing satisfaction allows the MMC to identify potential unfavorable effects of the UM program. It also allows identification of aspects of the UM program that are serving members well. When opportunities for improvement are identified, the MMC will recommend actions to improve performance and meet member/provider expectations.

- A. Gather and use the information that specifically addresses member and provider satisfaction.
- B. The survey includes:
 - 1. Member and provider satisfaction with the process of getting a service approved, obtaining a referral, and managing a case for the provider.
 - 2. UM questions specific to the overall process.
 - 3. Soliciting feedback from members and providers who have appealed a UM determination or have been involved in appeals related to UM determinations.
 - 4. Tracking member and provider complaints specifically related to UM by category and researching trends further when SHP has three (3) same/similar complaints or more in a six (6) month period.
- C. SHP uses Press Ganey/CAHPS survey results.
- D. Benchmarks are outlined in the workplan.

Scripps Health Plan

2026 Utilization Management Program Description

E. Present opportunities identified for improvement at MMC so recommended action plan can be made to improve the member and provider experience.

XX. Program Evaluation

The UM Program Description and UM Work Plan are subject to an annual review and revision, if appropriate. The UM Program Description and the UM Work Plan will be reviewed and approved by the MMC and MAC. The HICE tool and process will be utilized for the UM Work Plan.

XXI. UM Information Integrity

SHP has UM system controls in place to manage UM decisions, including but not limited to denials based on medical necessity decisions, receipt date, written notification, recording date, modified dates, timeliness of UM decisions, and notification history. These controls protect UM data from unauthorized modification or being altered outside of prescribed protocols. Audit procedures are in place to monitor the effectiveness of system controls. Any noncompliance is documented with oversight performed by the SHPS Compliance department.

SHP has policies describing its system controls specific to UM denial and appeal notification dates. Refer to policy *SHPS 889: UM Information Integrity* for additional details.

XXII. UM Trend Analysis for Quality Improvement

SHP UM Program is committed to our mission of providing superior health services in a caring environment and making a positive measurable difference in the health of individuals in the communities we serve. Our UM program has been developed to work collaboratively with SHP QI Program to provide a framework for analyzing the utilization of services provided to members and evaluating SHP data against national and regional benchmarks with the goal of continuous quality improvement. This framework includes, but it not limited to, reporting identified in policy *SHPS 827: Monitoring of Over/Under Utilization, Avoidable Days and Bed Days*.
